Receive Nursing education & skills training in multiple EU countries as AP students under the Erasmus program, with NO additional fee

All AMA-AP nursing program candidates (bachelor's and master's degree candidates) have the opportunity to study part of the nursing program studies and or its practical training for a period of a minimum of three months and a maximum of up to two full semesters in one of the other EU universities (outside of Poland). It means candidates would be able to live and study at one of the other EU member states (AP-approved university/faculty of nursing) with NO additional fee, this includes accommodation, living expenses local transportation, etc., under the Erasmus program.

Some of our Erasmus program countries are:

Germany, France, Italy, Ireland, Netherlands, Austria, Belgium, Sweden, Denmark, Finland, Norway, Czech Republic, and Switzerland

Such cross-country EU training would be an exceptional value AMA-AP nursing students can have and it will help our nursing program graduates secure employment and paid training opportunities after studies in the EU countries and or internationally.

Paid Summer Practical Training + part-time employment opportunity during the study period

All our Bachelor's & Master's nursing program students will have the opportunity to do paid practical training during the summer time "for each year" at some of the EU healthcare facilities and candidates may choose the country for the summer training based on the candidate's EU language & communication skills.

[Candidates can earn between Euro 500 to Euro 1,500 per month for the summer training, based on the candidate's local communication and professional nursing skills].

Optional free language class

Starting from the 2nd year of studies, candidates can join AMA's optional German, French, and Italian language classes (candidates can choose up to two language classes), free of charge. Such EU language training can prepare the candidate to be "more" qualified to take the paid practical summer training outside of Poland.

Further, it will also help the candidate to secure employment offers or paid apprenticeships in other EU countries, after securing the Nursing degree from AP

Employment opportunities in the EU countries after securing the Nursing Degree

Upon successful completion of the six semesters nursing bachelor degree program and four semesters master's nursing degree graduates, all will have multiple employment opportunities with AMA's network of partner healthcare facilities: including elderly care families, medical clinics, hospitals, and other healthcare service centers in the EU territories.

Compensation for the Initial Employment: AMA-AP nursing program qualified graduates could receive between Euro 2,000 and Euro 3,000 per month salary, by taking the employment contract with AMA partner healthcare facilities in the EU countries; the initial monthly salary range depends upon the actual employment facilities and candidates' communications skills/level in the local language.

Worldwide recognition

Accredited: Polonia University (Akademia Polonia) Częstochowa "AP", Poland: is a 32-year-old European Union university, with over 2,000 nursing program graduates working in EU countries and worldwide.

Candidate can take a US Nursing License (RN-NCLEX) Licensed and Accredited by the Polish Ministry of Education and Science:
